Good morning,

Here is our support note from Québec, Canada:

*Dear friends of Slovakia,*

*You are not alone in believing that the resource of the wind is misappropriated by companies that built a propaganda around the virtues of the wind turbines to sell their product and push governments to buy rapidly into the wind industry at large and everywhere.*

*We citizens of the world know that the windmill industry is not the answer to bring down fossil energy in the way it is being developed around the world. So far, wind turbines have not been able to close a single coal mine. Wind turbines, the way they are being developed now, are not the answer to reduce the Greenhouse effect.*

*We citizens in Quebec are in contact with the very many groups of citizens who are fighting for their territory, their health and their quality of life all around the province. We are in contact with each other on our territory, and through the EPAW, we are in contact with other groups in the world that are fighting that industry.*

*Citizens everywhere are living the same experience: an occupation of their territory without their consent by multinationals welcomed by our governments through the energy lobby. Citizens also have experienced first hand the effects of the wind turbines on their health and on the value of their properties. There are now dozens of groups everywhere in Québec fighting for their fundamental rights.*

*The wind energy has to be measured with real numbers, not by propaganda. Everywhere in the world citizens are asking for moratoriums to stop the development of that industry until independent studies are done and until the norms fixed by the citizens are established. So far the many fights of citizens in Quebec have established citizen's norms: no wind industry in inhabited areas, no wind industry along our rivers nor in our regional parks or on our agricultural land.*

*We are with you, let's keep in contact.*
