Hello Peter

My name is Jeannette Green and I am at present fighting against a Wind Turbine planning application the wind turbine which is to be erected near my home is at the height of 25 meters I live near farm land and beautiful open spaces also we have close to our converted barn an equestrian centre my property is surrounded by fields and Bridle ways, Footpaths, and much wild life ,However, We where successful in getting the planning permission stopped, but now the applicant is going to appeal against the decision. We are located in the most beautiful green belt area and if the applicant is successful in getting the decision overturned I will be opening my lounge curtains only to be confronted by the distant view of a wind turbine which the applicant gains and earns money from. These Turn bines are not cost effective they ruin our country side and any natural beauty. They should be banned let us all get together and protest so we may see our Grand children inherite peace, solitude and nature not wind turbines

Like to know your thoughts

Kind Regards

Jeannette
